

Checkout Form Template

This project is a template to build a Checkout form in ReactJS and connecting to Web3 MetaMask. There is some code as a markup to initialize and connect to Firebase and store the state data.

Features

- Sequencing forms with dependencies
- Submitting and connections to FireBase and MetaMask commented snippets

The image displays three sequential screens of a checkout form template, each with a title and a 'Continue' button.

- Screen 1: Checkout Form (Basic Info)**
 - Section: **Basic Info**
 - Form: **First Name** (Text input, value: Form)
 - Form: **Last Name** (Text input, value: Test)
 - Form: **Diet Restriction** (Dropdown menu, value: None)
 - Button: **Continue**
- Screen 2: Checkout Form (Address Info)**
 - Section: **Address Info**
 - Form: **City** (Text input, value: Toronto)
 - Form: **Province** (Dropdown menu, value: Ontario)
 - Buttons: **Back** and **Continue**
- Screen 3: Checkout Form (Payment Info)**
 - Section: **Payment Info**
 - Section: **Method Payment**
 - Radio buttons: **Bitcoin**, **Paypal**, **Credit Card**
 - Form: ☐ **I agree to the Terms & Conditions.**
 - Buttons: **Back** and **Submit**

Contributions

It is still incomplete, having improvements to be done. Any suggestion is welcome!
